

Satwik Srivastava

SUMMARY ✉ satwiksri.1759@gmail.com | 📞 +91 7668683268 | 🌐 [GitHub](#) | [LinkedIn](#)

Software Engineering student experienced in full-stack development and software quality assurance. Proficient in Python, REST API testing, and UI automation using modern frameworks. Skilled in executing test scripts, debugging issues, and applying analytical thinking to ensure reliability. Eager to leverage Agile methodologies and automation testing tools to deliver high-quality enterprise solutions.

EDUCATION

B.Tech, Computer Science Engineering	2022 – 2026
SRM Institute of Science and Technology (SRMIST), Chennai	CGPA - 8.0

EXPERIENCE

Software Engineer Intern — Altruisty	Jan 2024 – Mar 2024
---	---------------------

- Developed and tested frontend web components using React.js and Tailwind CSS, ensuring UI consistency and responsiveness.
- Integrated and validated REST APIs for AI-driven workflows via LangChain, performing functional testing for data integrity.
- Collaborated in an Agile environment to build scalable interfaces, identifying and resolving code defects early in the lifecycle.

Research Intern — Code-Clouse	Dec 2023 – Jan 2024
--------------------------------------	---------------------

- Engineered and executed manual test cases for web prototypes built with HTML, CSS, and JavaScript.
- Assisted in cross-browser UI testing and validation of responsive components, significantly improving user experience.

Web Development Head — CINTEL – NextGen AI	Sep 2022 – Aug 2023
---	---------------------

- Led frontend development activities, implementing code review processes and quality standards across the team.
- Supervised design decisions and conducted usability testing to enhance the end-user journey and accessibility.

PROJECTS

Automated API & UI Testing Framework <i>Python, Selenium, PyTest, REST API</i>	June 2024
---	-----------

- Engineered a comprehensive automation framework using Python and PyTest to validate REST API endpoints and UI functionality.
- Automated cross-browser frontend testing utilizing Selenium WebDriver, significantly reducing manual regression testing efforts.

Check X – Smart Automation App <i>Java, Android Studio, Puppeteer</i>	2024
--	------

- Engineered an Android application integrating Puppeteer-based web automation for accurate class scheduling and notifications.
- Designed and executed functional test scripts to validate scraping accuracy, reducing attendance false positives by 30%.

Data Analysis & Validation Pipeline <i>Python, Scikit-learn, Pandas, Data Quality</i>	2024
--	------

- Developed a Python-based processing pipeline to classify and analyze text data, demonstrating analytical problem-solving skills.
- Utilized Pandas for extensive data preprocessing, cleaning, and validation of large datasets to ensure high data accuracy.

SKILLS

Testing & QA	Automation, UI Testing, REST API Testing, PyTest, Selenium, Postman
Languages & Web	Python, JavaScript, Java, C++, React.js, Next.js, HTML, CSS
Backend & DBs	Node.js, Express.js, MongoDB, SQL, SQLite
Tools & Methodologies	Git, GitHub, Android Studio, Agile Scrum, Quality Assurance

CERTIFICATIONS & ACHIEVEMENTS

- **Hackathons & Projects:** Top 10 – Leap Hackathon (SRMIST); Built and maintained 10+ GitHub repositories.
- **Certifications:** NPTEL Certification (Java), HackerRank Certification (React), Scalar Certification (DBMS).
- **Leadership:** Directed Webathon Event – CINTEL NGAI Club.
